Cau giay, Ha Noi

Summary

An IT student specializing in Full-Stack development with a passion for building and optimizing production-ready software solutions. Fully available for full-time positions. Highly proficient in leveraging Multiple AI Agents to accelerate development workflows. Seeking opportunities in a professional environment to master engineering processes, apply deep-dive problem-solving skills, and drive impactful technical contributions.

Work Experience

Full-Stack Developer Intern-Fresher | MH Solution (01/2026 - Now)

Project: Central Office Advisory & Assessment System (Team-size: 5)

- UI/UX & Frontend: Developed components, data tables, and forms using Angular and NG-ZORRO / Ant Design.
- Logic & Performance: Designed API mapping, managed state via Angular Services, and optimized client-side filtering/searching.
- Full-Stack Development: Built Backend RESTful APIs using Java Spring Boot, owning full feature lifecycles.
- Workflow & Source Control: Managed code via GitLab, resolved merge conflicts, and followed CI/CD pipelines.

Project: T&Q Online Real Estate Trading Platform (Team-size: 3)

- Architecture & Scaffolding: Built Frontend Monorepo (pnpm Workspaces, Turborepo) following Modular Monolith approach.
- UI/UX & Frontend: Developed user-facing Webapp (Next.js) and admin CMS (React, Ant Design).
- Business Logic: Implemented Role-Based Access Control (User/Broker/Admin), KYC verification, wallet systems, and Audit Logs.
- Full-Stack & DevOps: Designed RESTful APIs, synced real-time data, and optimized build/deployment workflows.
- Workflow & Source Control: Maintained code quality via GitLab with ESLint/Husky linting.

JavaScript Intern | Zensho HSC (09/2025 - 12/2025)

Project: Enterprise Workflow Management System for Zensho Holding (Team-size: 15)

- Business Logic: Developed core Workflow engine, multi-level approvals, and automated notifications.
- Test Automation: Built E2E Testing workflows via Playwright; used AI Prompt Engineering to auto-generate test scripts.

Personal Projects

Den Hai Dang LC - E-commerce Platform (7/2025 – 10/2025)

- Architecture & DB: Conducted business analysis, designed system architecture, and modeled MongoDB database.
- Frontend & UI/UX: Prototyped UI in Figma and converted to responsive React.js codebase with SEO optimization.
- Backend & Cloud: Developed RESTful APIs via Node.js, managed version control via Git, and deployed on Render/Cloudflare.

Education

Bachelor of IT | Electric Power University
(2022 - 2027)
Current GPA: 3.66 / 4.0

Honors & Awards

Academic Merit Scholarship: 3 consecutive semesters (GPAs: 3.71, 3.86, 4.00/4.00).
Science & Engineering Awards (City Level):

- International Bronze Medal (Poland, 2021) & 2nd Prize City-level (2020): Arduino Rescue Robot.
- 3rd Prize City-level (2019): First-Aid Educational Game (Scratch).

Technical Skills

- Languages: JavaScript, TypeScript, Java, HTML5/CSS3.
- Frontend: React.js, Angular, Next.js, Tailwind CSS, Ant Design / NG-ZORRO.
- Backend & DB: Node.js, Java Spring Boot, MongoDB, PostgreSQL, MySQL.
- Tools & Cloud: Git/GitHub, GitLab, Figma, Docker, Linux, Cloud Basics.
- AI & Testing: Proficient in Multiple AI Agents orchestration, Unit/E2E Testing (Playwright).
- Others: Embedded Systems & IoT Prototyping (ESP32, Arduino).

Soft Skills

- Languages: English B1 (Technical documentation reading & basic communication).
- Productivity: High-speed typing (103 WPM), effective teamwork, and works well under pressure.
- Sports: Football, Badminton, Pickleball, Chess.
